# Assembly Kit Instructions

## DQBYKIT - Air Operated Diaphragm Pump Kit

This versatile and useful kit can be used to pump a range of fluids including oils, coolants, ATF, waste oils, water and diesel. The kit is safe and easy to use and is simply run by compressed air. With a high output of up to 100 litres per minute this is one of the best value pump kits around.

The versatility of this kit is another feature. This kit once assembled can be placed into a 205 litre drum to empty it then can be quickly and easily removed and placed into another drum as it just sits in the 2" bung hole and doesn't need to be screwed in.

**Assembled Kit**
